Champion Cloud Services Debuts Highly Flexible And Affordable “Cloud Continuity” Disaster Recovery Offering

BY **BUSINESS WIRE**

ARTICLE RATING:

FEBRUARY 9, 2010 10:24 AM EST

READS: **115**

Champion Cloud Services, a unit of IT services delivery provider **Champion Solutions Group**, today announced an innovative enterprise-class data recovery program that promises to remake the Disaster Recovery (DR) realm: “Cloud Continuity”

DR services. Leveraging the groundbreaking benefits of cloud computing, Champion’s Cloud Continuity services allow enterprises—especially growing mid-market businesses—to utilize an on-demand DR capability that delivers exactly the amount of IT resources needed, at the very time they’re needed most.

“Champion Cloud Services has developed a DR solution that dramatically lowers the price/risk ratio for the modern enterprise,” said Chris Pyle, president and CEO of Champion Solutions Group. “Now you can ensure the continuity of your data stores—and your business—without having to invest in a mirror-image, offsite redundant data center.”

No Capital Outlays

Unlike traditional disaster recovery paradigms, Champion’s Cloud Continuity solution requires no expensive outlays for a Disaster Recovery infrastructure

Comments

Java vs C++? Really?

By **Scott Quint**

kvorak wrote: Finally... somebody agrees. The reason people can't answer this question objectively is because it's the WRONG QUESTION, lol. Well said.

comprised of defined hardware and software. In the event of an anticipated emergency, the infrastructure is “turned on” and automatically synchronizes with the data for full application availability; afterward it is restored into the business’ onsite, primary infrastructure. Customers pay only for the resources used during the disaster incidence.

Because every customer’s Disaster Recovery requirements are different, Champion Cloud Services is able to set a customized monthly DR fee based on the customer’s Recovery Time Objective (minimum acceptable downtime) and Recovery Point Objective (age of restored files).

About the Champion Cloud Services:

Champion Cloud Services is a division of Champion Solutions Group, a recognized leader in providing IT solutions for over 30 years, with deep roots in delivering tangible results through the Virtualization of servers, storage, desktops and applications. Champion Cloud Services help companies reduce costs and increase productivity through the deployment of public and private cloud offerings. We offer a full range of Cloud Consulting Services and feature Champion’s Platform on Demand (PoD) Service and Microsoft Online Services. Champion Cloud Services specializes in helping companies assess their needs, determine the solution that best meets the needs of the business, and implementing that solution. For more information, Visit www.championcloudservices.com.
